SUBJECT INDEX

Ammonia
Interaction energy of formaldehyde with ammonia, 139

Bioactive peptides
Conformation of bioactive peptides: synthetic encephalins, 315
β-Blockers
Molecular orbital studies on β-blockers: conformation of acetophenone-*O*-(*tert*-butylamino-3-hydroxy-2-propyl) oxime and (*tert*-butylamino-3-hydroxy-2-propylimino)-9-fluorene, 301

C_5H_7 radical
Ab initio study of C_5H_7 radicals involved in the photolyses of 3-methylcyclopentene and 3-methyl-1,4-pentadiene, 231
C=C bonds
Halogen effects on the electronic characteristics of C=C, N=C and P=C bonds, 35
Carbonyl bond orders
Substituent effects on carbonyl bond orders, 83
Carbonyl transients
Comparative study of the charge distribution in tetravalent carbonyl transients and organophosphorus adducts of trypsin, 335
Category theory
On graph theoretical SAR and the mathematical theory of categories, 21
Conjugate polymers
Molecular orbital theory on straight chain conjugate polymers, 99

Deazaadenine nucleoside antibiotics
Biological activity of 7-deazaadenine nucleoside antibiotics: a theoretical study, 275
Diatomic partial charges
Studies on electronegativity equalization. Part 1. Consistent diatomic partial charges, 71
Dihydropteroate synthase inhibition
Theoretical conformational analysis, electronic structure and molecular modelling studies in dihydropteroate synthase inhibition by multisubstituted sulphones, 293

Electron density matrix
Decomposition of electron density matrix and total energy of supermolecule in the method of non-orthogonal localized molecular orbitals, 1
Electron transfer reactions
Free-energy relationships in organic electron transfer reactions, 209
Electronegativity equalization
Studies on electronegativity equalization. Part 1. Consistent diatomic partial charges, 71

Formaldehyde
Interaction energy of formaldehyde with ammonia, 139

Graph theory
On graph theoretical SAR and the mathematical theory of categories, 21

Hydrogen–oxygen fuel cell
A refined theoretical investigation of the oxygen-electrode processes of an alkaline hydrogen–oxygen fuel cell, 185
Hydroxyketene
Protonation and hydration of hydroxyketene, 165

Many-body perturbation theory
Applications of the many-body perturbation theory in the localized representation: structural effects in the correlation energy of normal saturated hydrocarbons, 61
3-Methyl-1,4-pentadiene
Ab initio study of C_5H_7 radicals involved in the photolyses of 3-methylcyclopentene and 3-methyl-1,4-pentadiene, 231
3-Methylcyclopentene
Ab initio study of C_5H_7 radicals involved in the photolyses of 3-methylcyclopentene and 3-methyl-1,4-pentadiene, 231

MM2 force field
Computational test for the performance of the improved MM2 aromatic force field, 115
Multiple-energy minima
Manifestations of stability interplay between potential-hypersurface multiple energy minima in heat-capacity enhancement, 89
Multisubstituted sulphones
Theoretical conformational analysis, electronic structure and molecular modelling studies in dihydropteroate synthase inhibition by multisubstituted sulphones, 293

N=C bonds
Halogen effects on the electronic characteristics of C=C, N=C and P=C bonds, 35
Nucleoside analogues
Specificity of transcription and incorporation of nucleoside analogues, 247

Octanes
Correlation of enthalpy of octanes with orthogonal connectivity indices, 45
Organic structures and reactivities
Multiconfiguration self-consistent-field (MCSCF) approaches to organic structures and reactivities, 129
Organophosphorus compounds
Comparative study of the charge distribution in tetravalent carbonyl transients and organophosphorus adducts of trypsin, 335
Orthogonal connectivity indices
Correlation of enthalpy of octanes with orthogonal connectivity indices, 45
Oxygen-electrode processes
A refined theoretical investigation of the oxygen-electrode processes of an alkaline hydrogen–oxygen fuel cell, 185

P=C bonds
Halogen effects on the electronic characteristics of C=C, N=C and P=C bonds, 35
Planar molecules
Analytical formulae for the enumeration of substitutional isomers of planar molecules, 13
Polychlorobiphenyl congeners
Conformational potential energy curves for low lying excited states of selected polyfluorobiphenyl (PFB) and polychlorobiphenyl (PCB) congeners, 147
Polyfluorobiphenyl congeners
Conformational potential energy curves for low lying excited states of selected polyfluorobiphenyl (PFB) and polychlorobiphenyl (PCB) congeners, 147
Prazosin analogues
Molecular orbital study of the nitrogen basicity of prazosin analogues in relation to their α_1-adrenoceptor binding affinity, 343

Saturated hydrocarbons
Applications of the many-body perturbation theory in the localized representation: structural effects in the correlation energy of normal saturated hydrocarbons, 61
Supermolecule
Decomposition of electron density matrix and total energy of supermolecule in the method of non-orthogonal localized molecular orbitals, 1
Synthetic encephalins
Conformation of bioactive peptides: synthetic encephalins, 315

Trypsin
Comparative study of the charge distribution in tetravalent carbonyl transients and organophosphorus adducts of trypsin, 335
